

QR SOLUTIONS FOR BUSINESSES

Connect the physical world to digital — with one QR.

Dedicated panels for hotels, education, healthcare, manufacturing, retail and logistics. Produce QR codes in bulk, manage content in one place and follow requests and records live.

No app needed

Industry-specific panels

Bulk production

NFC option

No app

Opens with the phone camera

The QR never changes

Update content from the panel

QR + NFC

Optional tap-to-open tags

PLATFORM

How it works

01

Produce

Create QR codes in bulk and print them with your logo and colours.

02

Place

On rooms, machines, shelves or parcels. NFC tags available.

03

Scan

Guests, students or staff open it with their phone camera — no app.

04

Manage

Requests and records land on your panel; update content in one place.

Included in every industry

Industry-specific panel

Organisation, unit and module management

Bulk QR production

Print-ready with your logo and colours

Content in one place

Update content, the QR stays the same

Up to 10-minute recordings

Voice and video on business QR codes

NFC tag option

Tap to open, with QR backup

No app needed

Opens in the iPhone and Android browser

Role-based access

Admin and staff roles

Secure platform

Encrypted connection, login logout

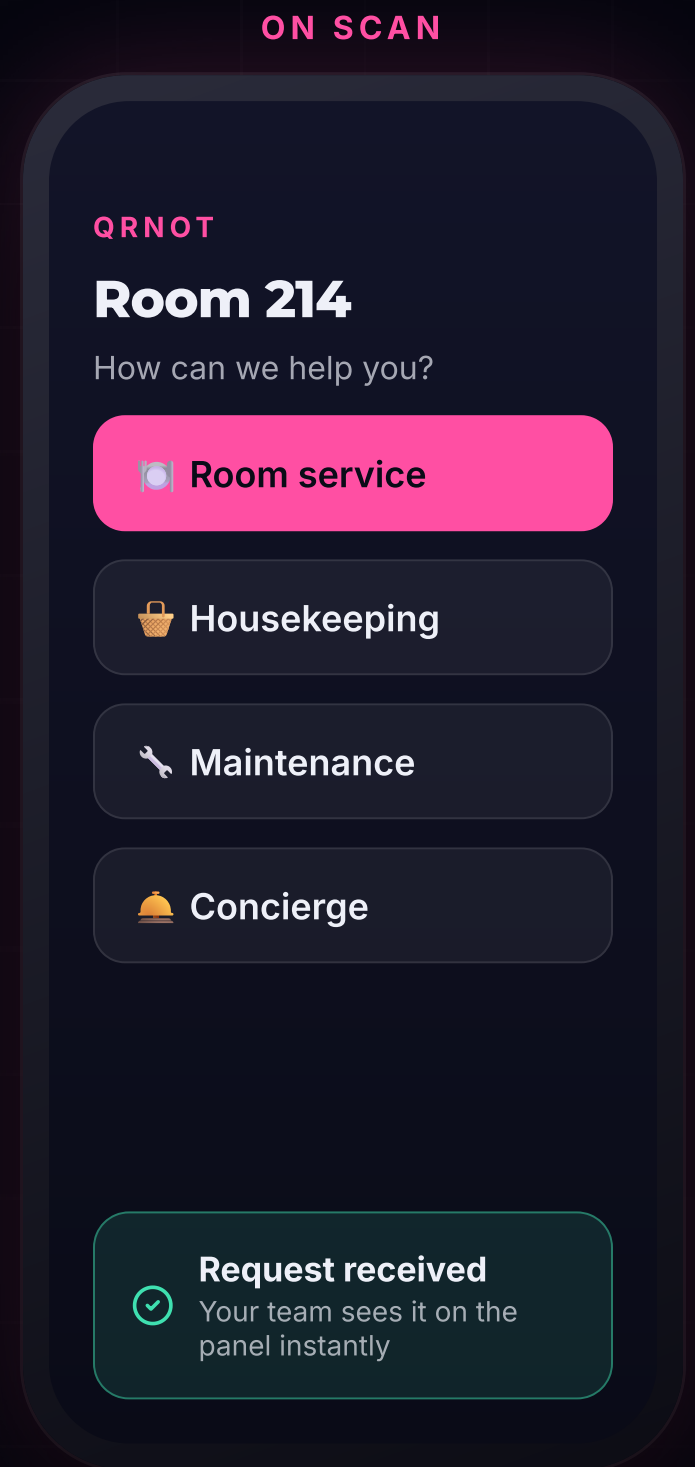

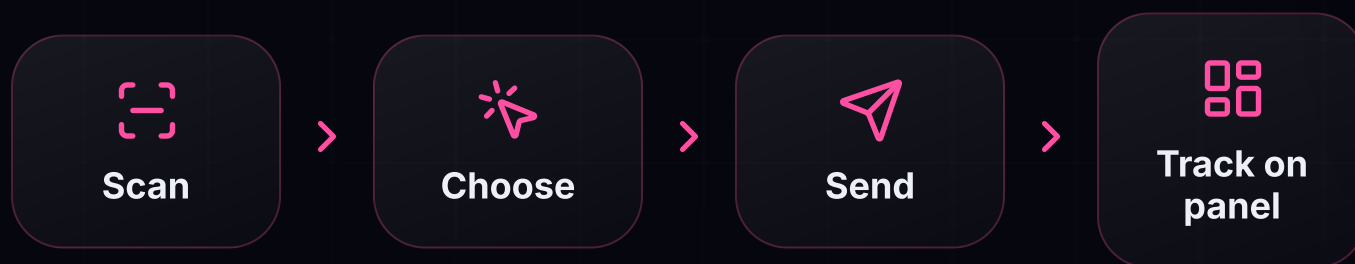

From room to reception with one QR

Guests scan the QR in their room to request room service, housekeeping, maintenance or concierge — without calling reception. Your team tracks every request on a live panel.

WHERE IT IS USED

-  In-room card
-  Back of the door
-  Reception
-  Restaurant table

FLOW

MODULES

Room service orders
Order from the menu, delivered to the room

Housekeeping requests
Towels, cleaning, extra items

Maintenance
Fault and repair reports

Concierge
Guest requests in one channel

Voice notes
Attach a voice note to a request

Live operations panel
Manage requests by status

Bulk room QR codes
A dedicated QR for every room

Operations analytics
Last-24-hour requests and orders

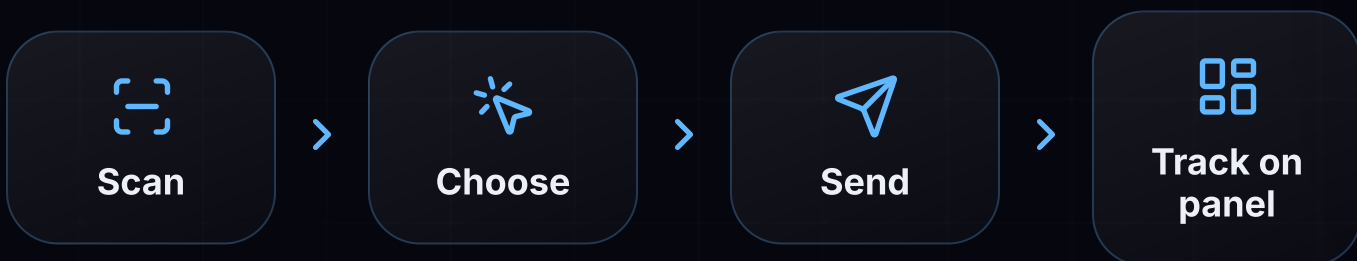

One QR on the classroom door

Students scan to check in, open lesson materials and audio/video explanations, and see homework and announcements. Teachers and staff manage everything from one panel.

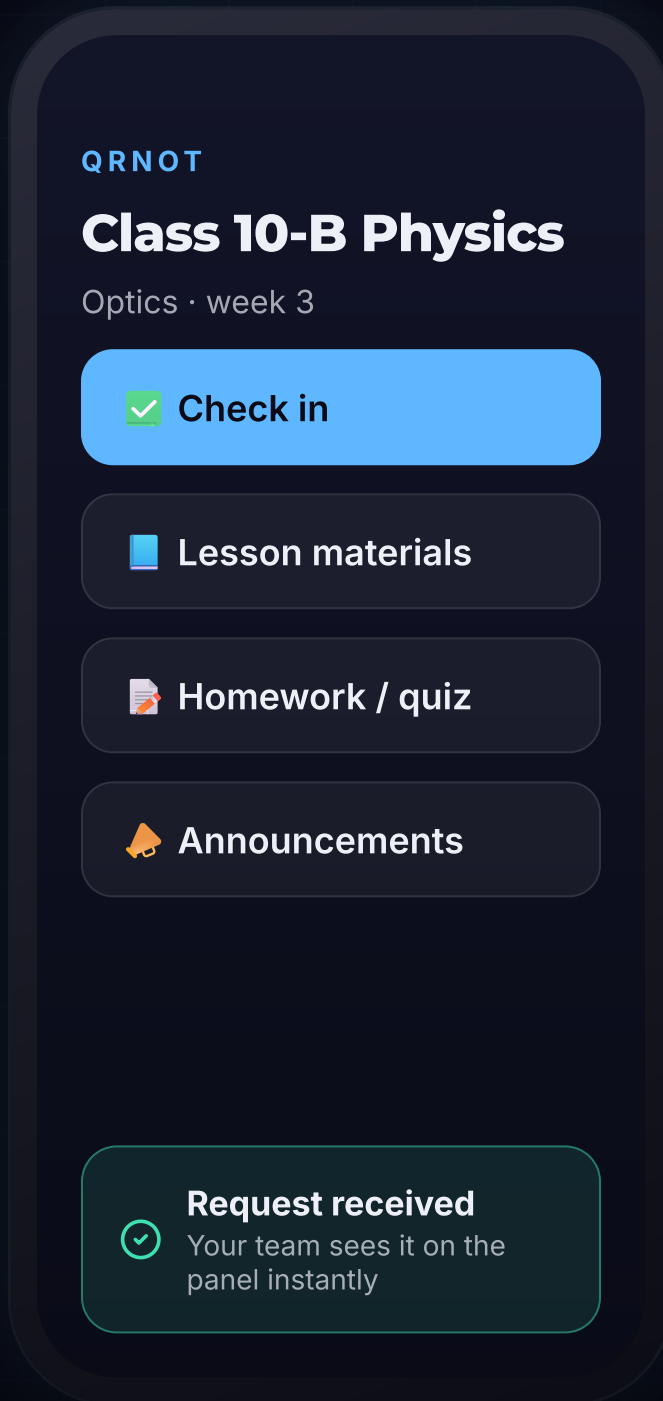

WHERE IT IS USED

-  Classroom door
-  Textbook
-  Notice board
-  Laboratory

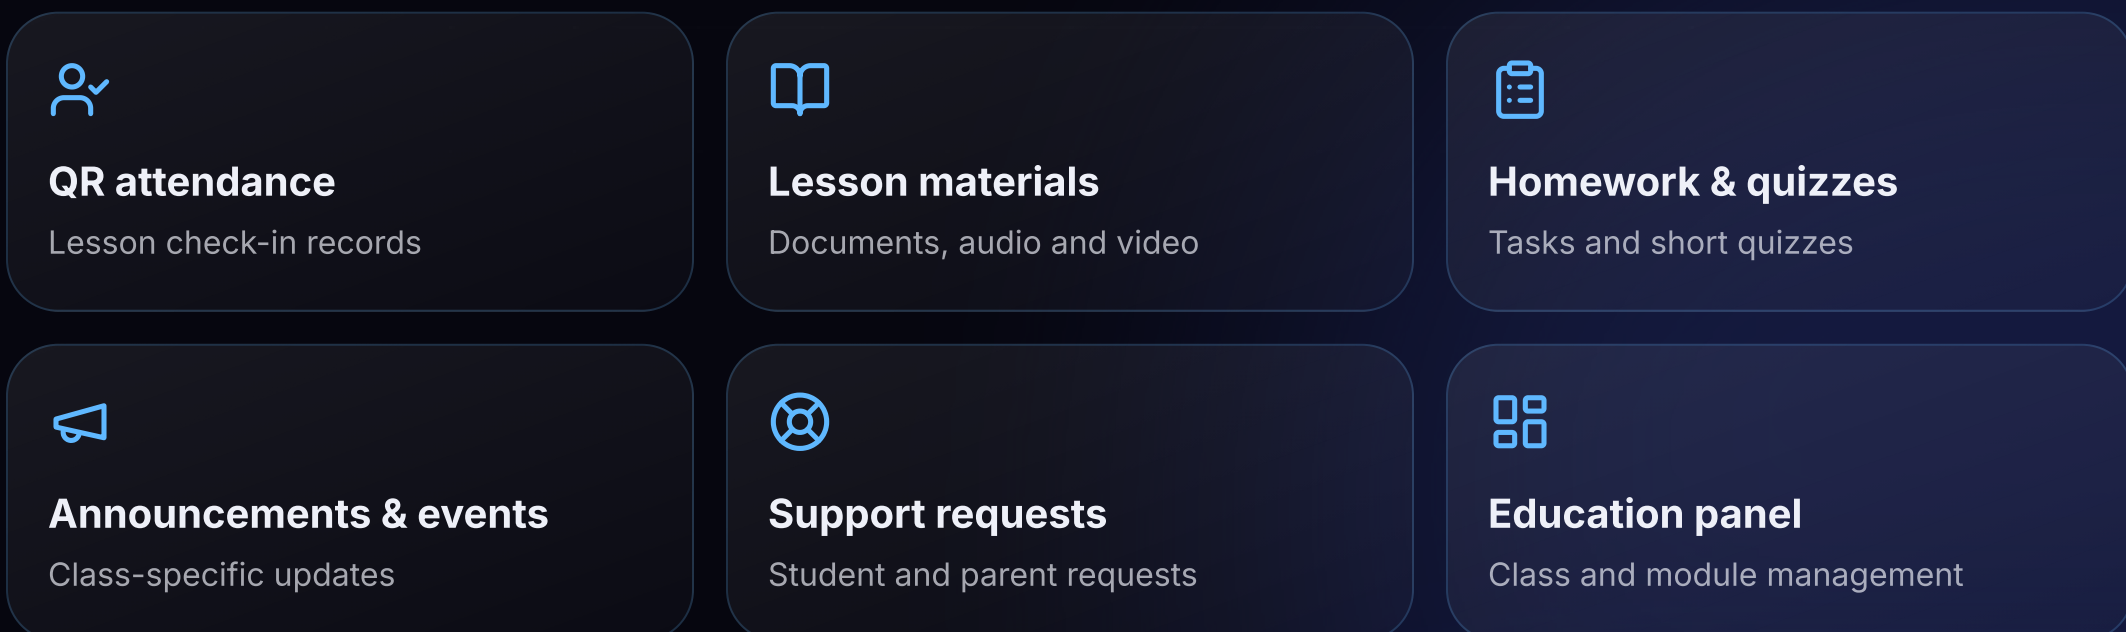

FLOW

ON SCAN

MODULES

HEALTHCARE

The right information in the right place

Patient information, wayfinding and medication / device instructions for patients and families; hygiene audits, ward rounds and emergency protocols for staff — all from one QR.

WHERE IT IS USED

-  Clinic door
-  Patient room
-  Medical device
-  Medication pack

FLOW

ON SCAN

QRNOT

Cardiology Clinic

Welcome

 Patient information

 Directions

 Medication

 Device guide

Request received

 Your team sees it on the panel instantly

MODULES

Patient information

Process and preparation info

Clinic wayfinding

Directions to departments

Medication instructions

Dosage and usage guidance

Device instructions

Video and step-by-step guides

Appointments & discharge

Reminders and process info

Hygiene audits

Checklist records

Emergency protocols

Quick access for staff

Ward rounds & staff check

Recorded steps

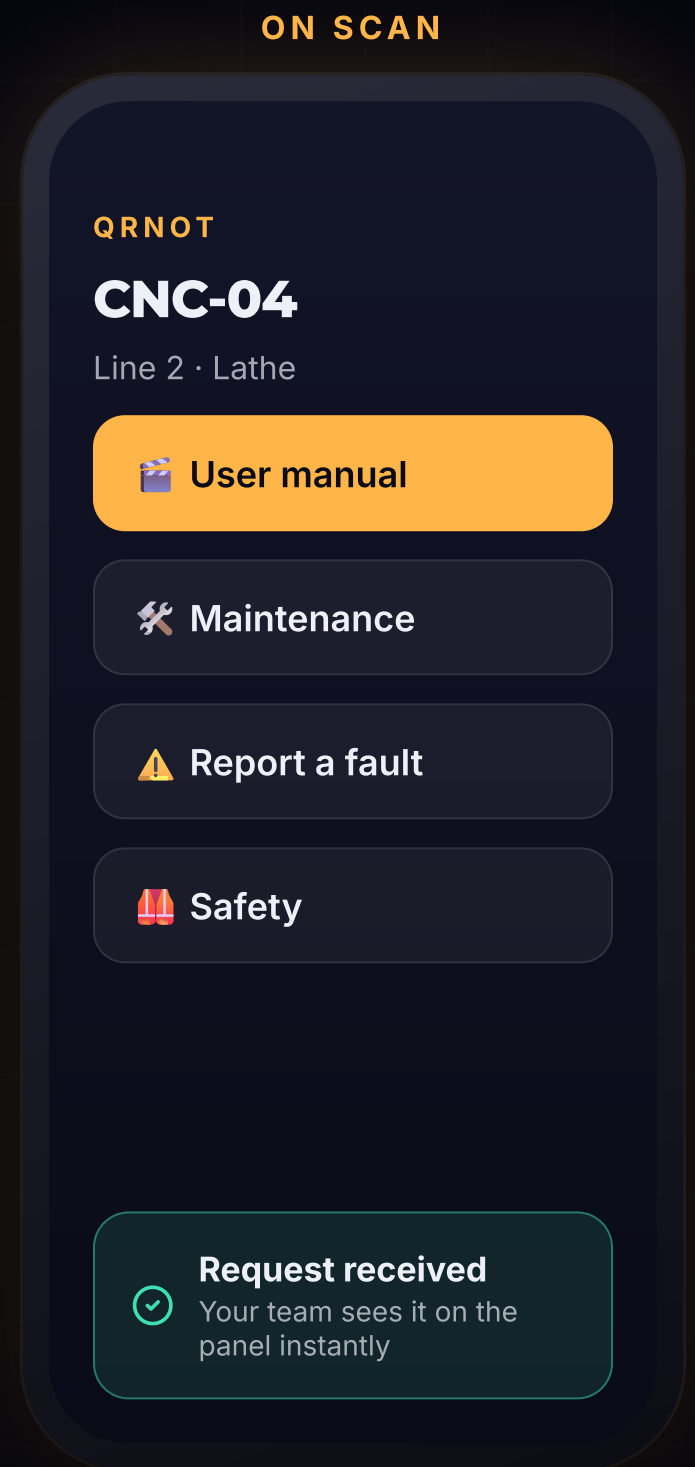

The manual lives on the machine

One QR on a machine or on the product you make: user manuals and assembly videos, safety flows, maintenance and fault reports, operator training and quality-check records — one scan away.

WHERE IT IS USED

-  Machine body
-  Production line
-  Product / packaging
-  Warehouse rack

FLOW

MODULES

User manuals

Video, images or a PDF link

Safety flow

Machine safety steps

Maintenance requests

Scheduled and breakdown

Defect / fault reports

Records with photos

Operator training

Standard video training

Quality checks

Checklist records

Conveyor counts

Line-based count records

Raw material intake

Incoming inspection records

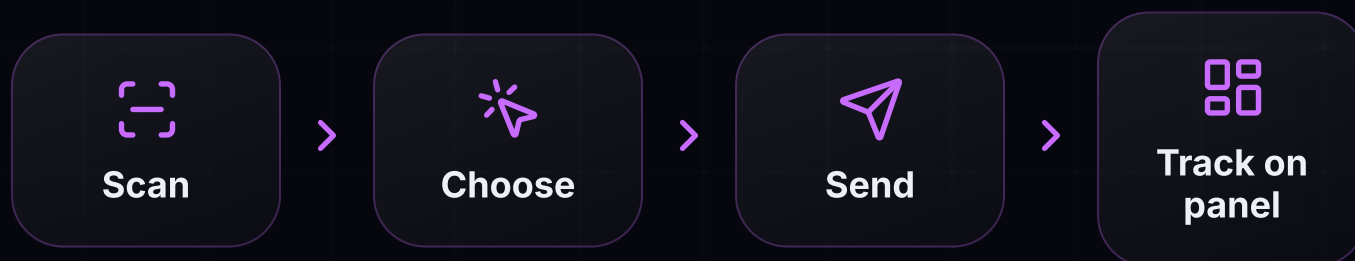

Let the shelf tag talk

The shelf QR tells the product story: intro video, ingredients and origin. Price and campaign checks, staff task lists and customer surveys run on the same platform.

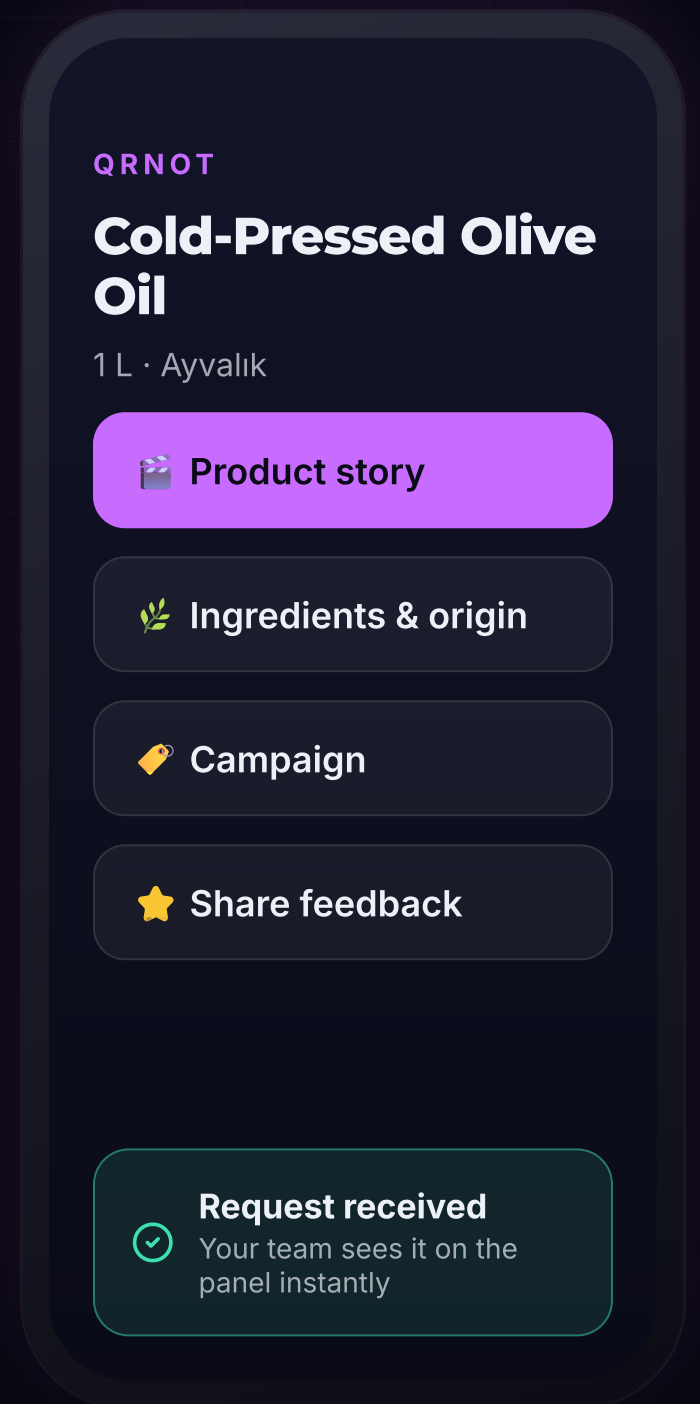

WHERE IT IS USED

-  Shelf tag
-  Product packaging
-  Checkout
-  Shop window

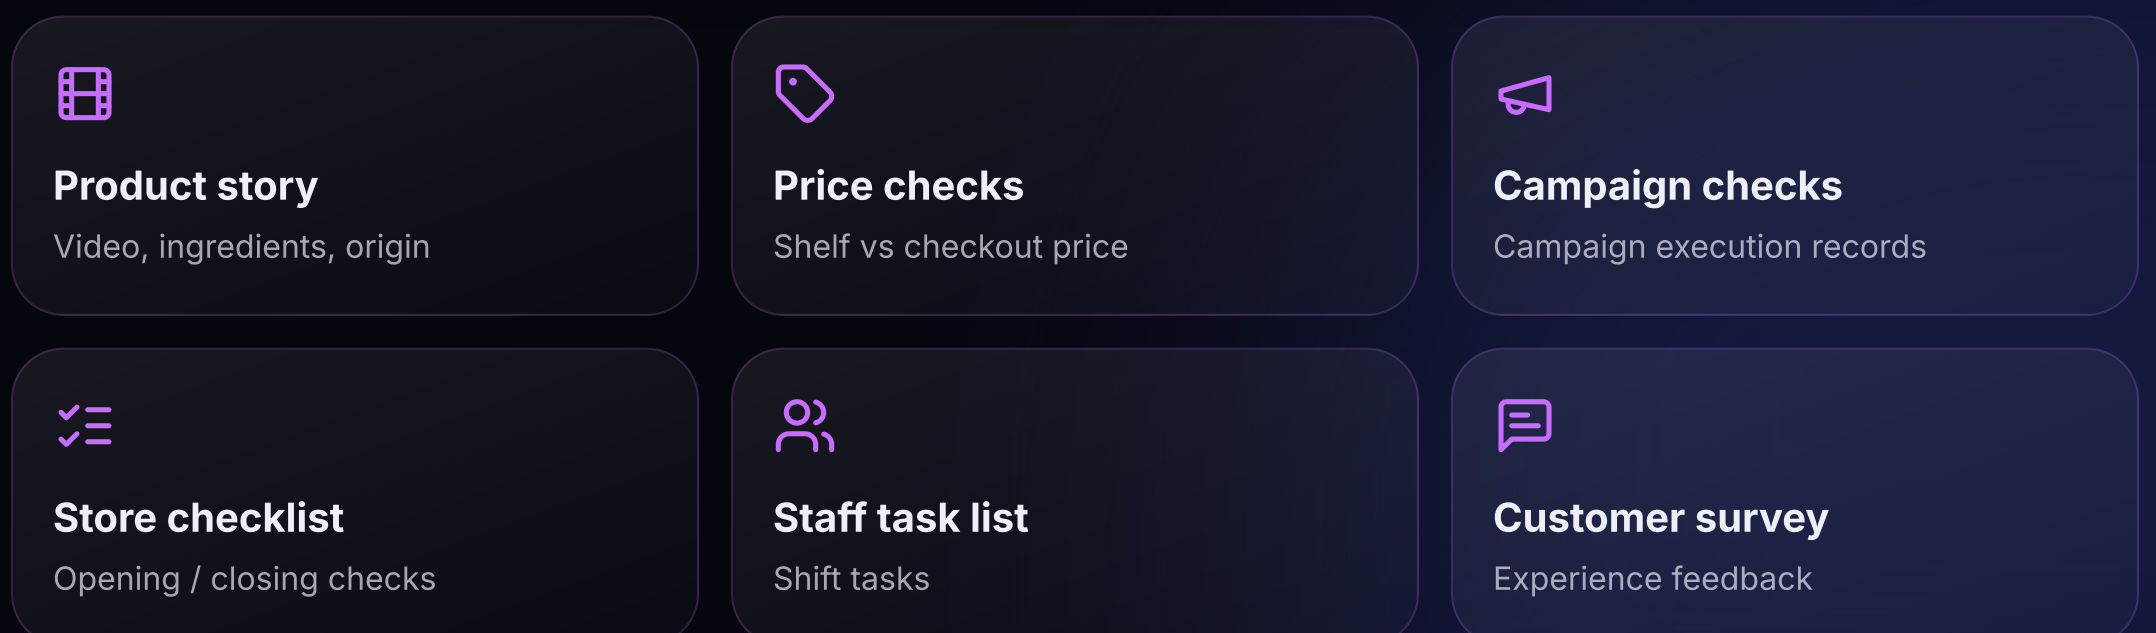

FLOW

ON SCAN

MODULES

Every step on record

QR codes on parcels, vehicles and racks: proof of delivery, damage reports, vehicle checks, route handoffs, cold-chain entries and customs documents are recorded with one scan.

WHERE IT IS USED

-  Parcel label
-  Vehicle
-  Warehouse rack
-  Loading dock

Rack-based count records

GETTING STARTED

From setup to daily use

01

Discovery call

We decide together where to start and which modules to use.

02

Pilot

We start small with one unit or line.

03

Bulk production

QR / NFC tags are prepared with your logo.

04

Team training

A short training for your team on the panel.

FAQ

Do people need to install an app?

No. The QR opens in the phone browser via the camera.

Can content change after printing?

Yes. The QR stays the same; you update content from the panel.

Is NFC required?

No. NFC tags are optional; the QR works on every phone.

Can it carry our logo?

Yes. Bulk production uses your logo and brand colours.
